Date.15.04.2025

Dear Parents

We're thrilled to announce that the school is going to introduce Robotics Club from tomorrow. We are launching an engaging new session on Robotics & Artificial Intelligence!

This session is designed to introduce our students to the future of technology. Our young innovators will:-

- Explore the fundamentals of Robotics
- Understand the power of Artificial Intelligence
- Build real-life projects that bring their ideas to life!

Through hands-on learning, teamwork, and creativity, students will not only gain technical skills but also the confidence to dream big in the world of technology.

There will be four Robotic classes in a month (every Wednesday) . The charges for the same is Rs. 350/- per month. Kindly note that this club can't be changed

Let's spark curiosity, foster innovation, and build the future—one robot at a time!

Stay tuned & get ready to build, code, and create!

Mrs. Gurmant Kaur Gill
Principal
